

SYAHRIL ARFIAN ALMAZRIL

6281511463282 | azril4974@gmail.com | <https://linkedin.com.in/syahril-arfian-almazril> | DKI Jakarta

A highly motivated and detail-oriented undergraduate student pursuing a degree in Information Technology, with strong interests in Big Data, Machine Learning, and Artificial Intelligence. Equipped with solid foundations in programming, data management, and AI concepts, strengthened through hands-on research experience at Telkom University's Cyber Physical Systems Laboratory, where I contributed to data processing, machine learning modeling, and AIoT system integration. Additionally, my role as a Project Officer at Digistar Club by Telkom Indonesia has enhanced my leadership, coordination, and communication skills through managing digital technology programs and collaborating with diverse stakeholders. I am eager to apply both my analytical and interpersonal capabilities in a challenging internship environment to support organizational success and advance my professional development in the technology industry.

Experiences

HUMIC (Human Centric) Engineering Research Center - Hybrid Sep 2025 - Present

AI Developer

- Managed and processed large-scale datasets across the full machine learning pipeline, including preprocessing, feature engineering, and data validation.
- Developed and trained Deep Learning and Transformer-based models to detect and classify attack patterns in network and behavioral datasets.
- Collaborated with the research team to build AI-driven threat detection systems supporting intelligent and secure system development.

Informatics Laboratory Telkom University - FullTime Sep 2025 - Present

Computer Network Practicum Assistant

- Guided students throughout hands-on networking practicums covering HTTP, DNS, UDP, TCP, DHCP, ICMP, Ethernet, ARP, Web Server, and WiFi.
- Served as PIC for the Socket Programming project, mentoring student groups and assessing their implementation and documentation.
- Evaluated practicum assignments, reports, and exam performance to ensure learning outcomes were met.

Digistar Club by Telkom Indonesia – Remote Feb 2024 – Agustus 2024

Project Officer – Digital Aplication Club

- Lead the end-to-end planning and execution of DigiCourse 2025 as Project Officer under the Digistar Club at Telkom Indonesia.
- Designed interactive event concepts that enhanced participant engagement and aligned with the latest trends in digital technology.
- Coordinated with speakers, partners, and internal teams to ensure the successful organization and achievement

Cyber Physical System Laboratory - FullTime May 2025 - Present

Artificial Intelligent (AI) Big Data Research Assistance & HR Staff

- Conducted advanced data analysis to generate actionable insights supporting AI-driven system development and research initiatives.
- Designed, developed, and fine-tuned machine learning models using real-world datasets to meet specific project objectives.
- Assisted HR operations by supporting internal documentation, coordination, and organizational workflow needs within the laboratory.

Food and Agriculture Office of Bandung City. – FullTime May 2024 – June 2024

Data Entry & Researcher, Intern

- Performed accurate daily data entry, validation, and consolidation to ensure data completeness and consistency for reporting and analysis.
- Prepared timely and professional reports for stakeholders, highlighting key trends and insights to support data-driven decision-making.
- Maintained a structured internship logbook to document daily tasks, achievements, and skill development throughout the internship.

Education Level

Telkom University - Bandung, Jawa Barat Aug 2023 - Present

Bachelor's degree in Information Technology | GPA: 3,52 / 4.00

- Actively engaged in academic activities, organizations, and communities both on and off-campus, with consistent participation in data science and machine learning competitions at the university and national levels.
- Successfully executed end-to-end machine learning projects, including data preprocessing, balancing, training, testing, and performance evaluation, achieving a final score of 92/100.
- Contributed to the integration of machine learning outputs into AIoT-based web dashboards, enabling real-time data visualization and decision support.

Mathematics and Sciences | Grade: 89.65 / 100

- Established a solid foundation in mathematics, physics, and scientific reasoning through a rigorous curriculum.
- Developed strong analytical thinking and problem-solving skills applicable to data analysis, logical reasoning and research-based learning.

Skills, Achievements & Other Experience

- **Soft Skills:** Leadership, Teamwork, Time Management, Public Speaking, Negotiation, Collaboration, Critical Thinking, Analytical Skills, Adaptability, Communication, Networking, Problem-Solving, Decision-Making, Conflict Resolution, Project Coordination, Fast Learning, Work Ethic, Attention to Detail
- **Hard Skills:** Python Programming (with libraries such as NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow, and PyTorch), Machine Learning Algorithms (including linear regression, decision trees, random forests, gradient boosting, k-nearest neighbors, and support vector machines), Deep Learning (including convolutional neural networks for image classification, object detection, and computer vision tasks, as well as RNN/LSTM architectures for sequence modeling), Transformer-Based Models (including BERT, GPT, and other modern NLP architectures for text classification, embeddings, and large language model fine-tuning), Data Modeling (with expertise in feature engineering, hyperparameter tuning, and advanced model optimization techniques), Data Processing (skilled in data cleaning, transformation, normalization, and handling complex real-world datasets), Data Visualization (using tools such as Matplotlib, Seaborn, and Plotly), and Statistical Analysis (including hypothesis testing, regression analysis, and model evaluation across traditional and deep learning workflows).
- **Tools:** Visual Studio Code, Google Collab, GitHub, Git, Jupyter, Conda, Figma
- **Training & Certification :** Data Analyst on Google Cloud (Google Cloud, Certification Number: 13612507, 2025), Supervised Machine Learning Regression and Classification (DeepLearning.AI, Certification Number: JEZL7ZL9SADP, 2025), Machine Learning Foundation (Amazon Web Services, Certification Number: 4fc1c551-1f68-47cc-b371-d2785495ae61, 2024), Machine Learning Modeling (Dicoding Indonesia, Certification Number: 1RXY20W6KXVVM, 2024).
- **Projects :**
 - Data Classification with SVM, KNN, and Naïve Bayes (2025): Developed and implemented machine learning models for classifying datasets using Support Vector Machine (SVM), K-Nearest Neighbors (KNN), and Naïve Bayes algorithms to optimize classification accuracy and performance.
 - Convolutional Neural Network (CNN) for Image Classification (2025): Utilized CNN architectures to classify images, demonstrating the ability to preprocess, train, and evaluate models for accurate object recognition across various datasets.
 - Real-Time Object Detection Using YOLO - AI Model (2025): Implemented real-time object detection using the YOLO algorithm to detect and classify objects in live video streams, optimizing for speed and accuracy in real-world applications.
- **Competition :**
 - Top 6/32 in Business Case Prototype – GENBI UNSHIKA (2025): Secured a top 6 position out of 32 teams in a highly competitive business case prototype challenge, where I developed innovative solutions addressing real-world business problems, showcasing strong analytical and problem-solving skills.
 - Top 15/90 in Data Mining Competition – Telkom University (2024): Achieved a top 15 ranking out of 90 participants in a data mining competition, where I applied advanced data analysis techniques and machine learning models to solve complex datasets, demonstrating proficiency in data processing and modeling
